Harmonic Beacon + Personal Myth Projection (PMP)

A signature, substance-free wellness experience for the inner journey gap.

NotebookLM

Deep inner journeys have moved from cultural niche to premium international demand.

Spa Relaxation

The baseline of hospitality. Guests seeking passive rest, background music, and surface-level unplugging.

Mental Health Mainstreaming & Psychedelic Renaissance

The cultural shift that legitimized active inner work and self-knowledge.

The Premium Inner Journey

Wellness tourism guests now actively seek depth, meaning, guided experiences, and structured transformation—not just rest.

NotebookLM

Premium hospitality operators lack formats with commercially legible depth.

Operators are forced to choose between generic background noise or crossing into medical/substance-based risk. Supply did not keep up with demand.

NotebookLM

We are building a new category: the substance-free, structured sound-symbolic experience.

Careful Protocol

Situated listening, non-obligatory participation, and safe entry/exit.

Proprietary Technology

A uniquely organized acoustic environment.

Symbolic Guidance

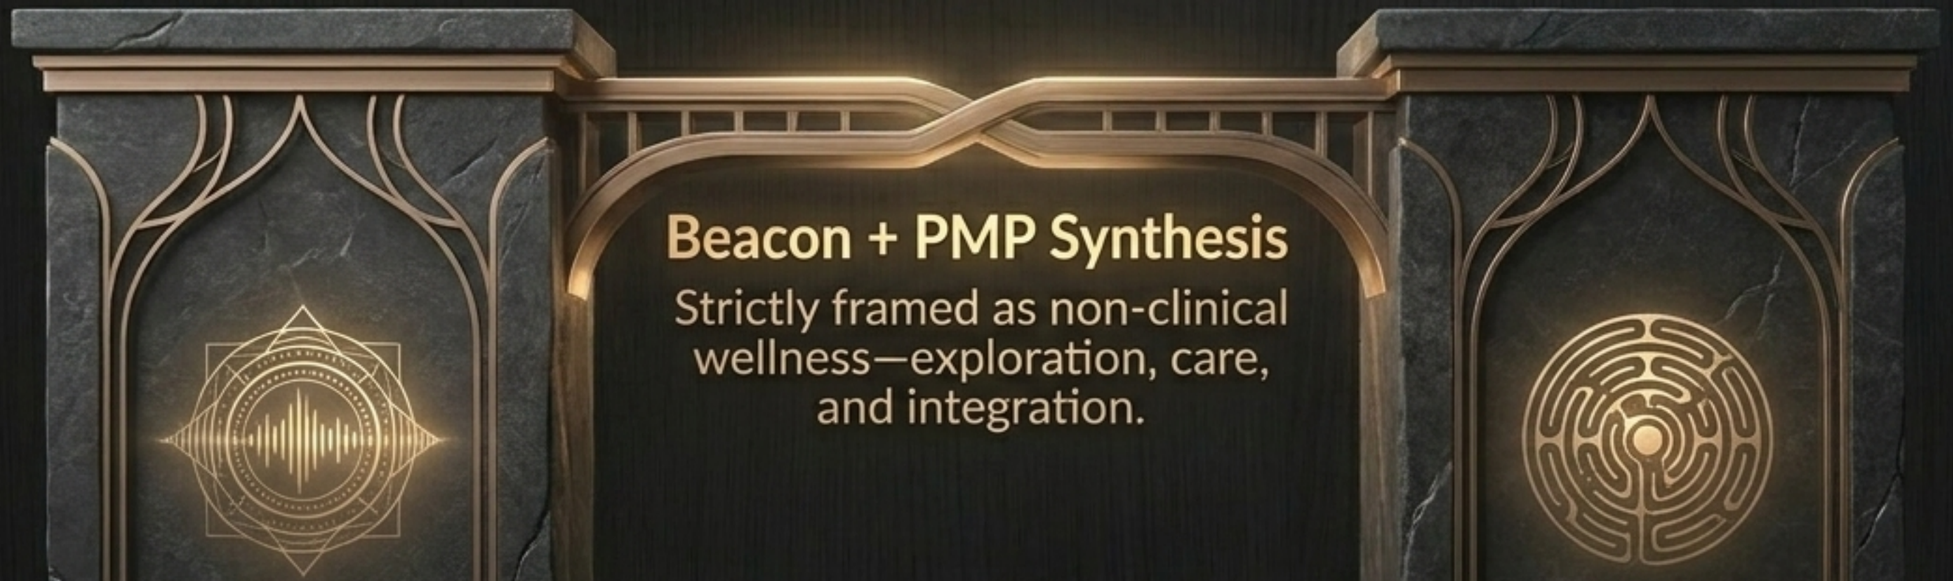

Narrative framing that provides meaning without requiring clinical intervention.

A Defensible Wellness Amenity

It is not a clinical treatment. It is not therapy. It is not an app.
It is a live, signature wellness journey.

NotebookLM

A proprietary harmonic acoustic field synthesized with over 15 years of symbolic practice.

Beacon + PMP Synthesis

Strictly framed as non-clinical wellness—exploration, care, and integration.

Harmonic Beacon

A device and protocol creating a proprietary harmonic field through sound under situated listening.

Personal Myth Projection (PMP)

A structured symbolic process with over 15 years of commercial and professional practice, and an already sold standalone training course.

NotebookLM

Exploratory sessions revealed a strong qualitative pull and repeated voluntary interest.

Origin

Began as an experimental probe for Harmonic Information Theory (HIT)—to make harmonic structure perceptible in embodied listening.

Exploration

Nearly a year of free, exploratory implementations (Tai Chi groups, elder day-care, remote sessions, and Edge City 2025).

The Signal

At Edge City, people returned, queued to use the device again, and reported positive subjective effects.

Boundary Note: These are experiential accounts, not clinical evidence. The pull from actual use justified testing Beacon as a disciplined wellness format.

NotebookLM

Costa Rica provides the ideal market context to accelerate our first paid pilots.

2.92M
Tourists (2024) with ~55% U.S. arrivals.

USD 5.4B
Total tourism income.

~9-10%
Annual wellness-market growth.

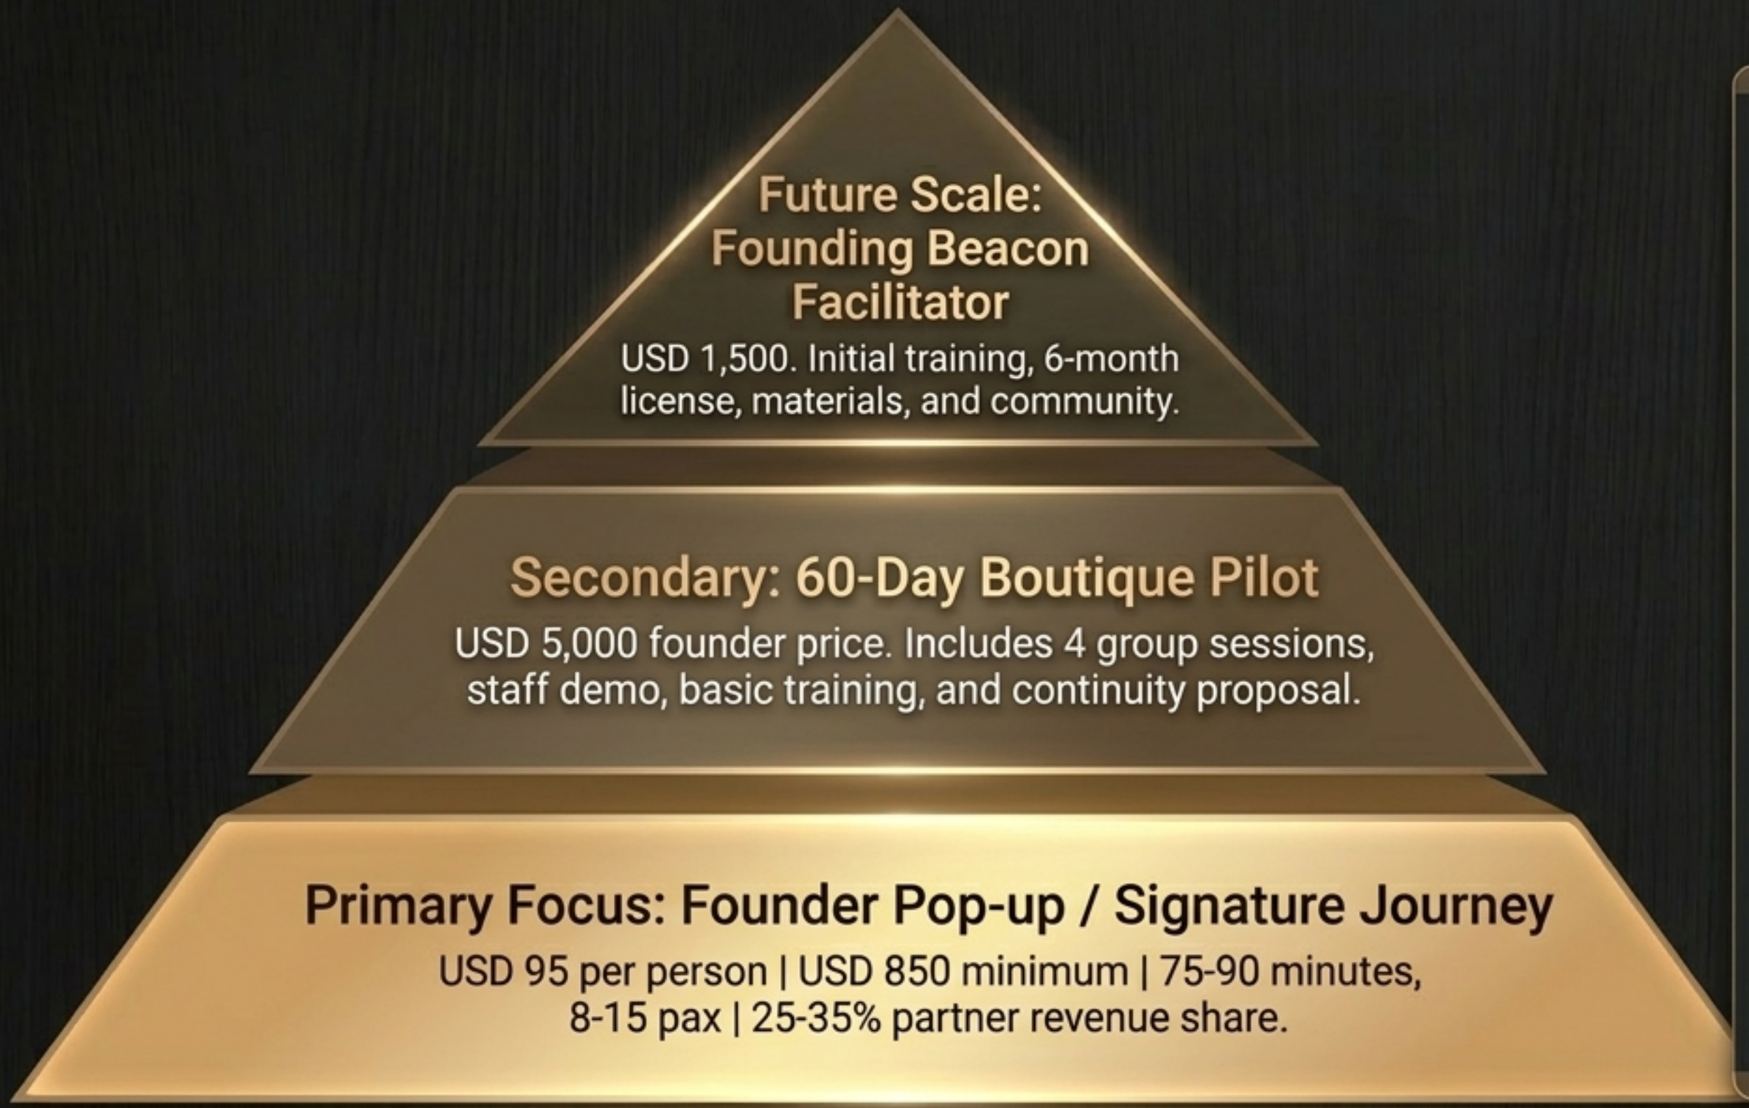

Strategic Assets
Official Wellness Pura Vida positioning, established retreat infrastructure, and Nicoya Blue Zone brand value.

Costa Rica is not proof of product-market fit. It is the precise buyer context needed to test it—where boutique operators need differentiation and guests already pay for premium formats.

NotebookLM

The commercial wedge is an operator-led, B2B2C Founder Pop-up.

Operator Logic

We do not acquire cold D2C consumers. We sell to operators who already have the audience, space, calendar, and trust.

NotebookLM

Lane Guard: Our greatest risk is category confusion; our strongest mitigation is strict non-clinical discipline.

Claims to Avoid

Therapy / Clinical treatments
Medical Devices
Cures
Magic Frequencies (432/528 Hz)
Pseudoscience
Psychedelic-adjacency

The Actual Lane

Non-clinical wellness
Exploration
Presence
Integration
Consonancia
Care-oriented protocol

Extreme discipline is our commercial moat. We deliberately separate Beacon, PMP, the App, and AI to protect hospitality partners from legal and reputational exposure.

NotebookLM

We sequence our roadmap to protect the project from overclaiming.

NOW: Current Phase
First Paid Pilots

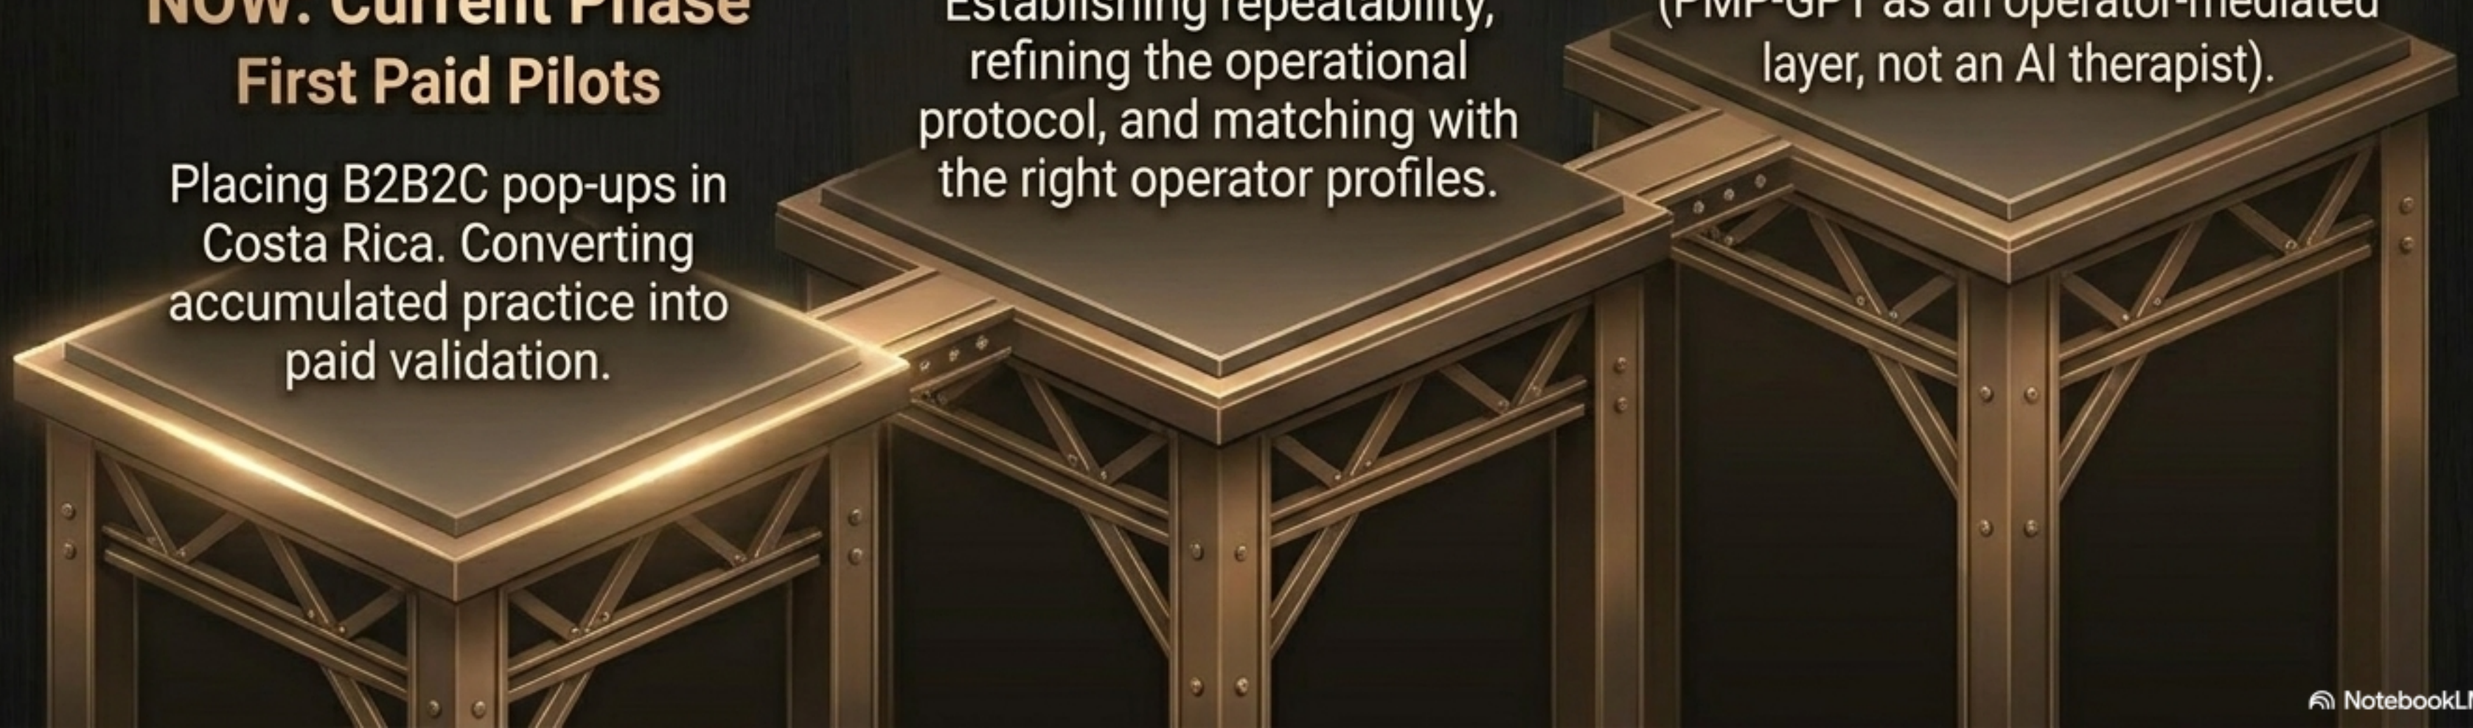

Placing B2B2C pop-ups in Costa Rica. Converting accumulated practice into paid validation.

NEXT: Medium Term
Refinement & Fit

Establishing repeatability, refining the operational protocol, and matching with the right operator profiles.

LATER: Scaling Phase
Continuity & Networks

App continuity (built, unlaunched; utilized post-experience), Facilitator scaling/Site kits, and AI support (PMP-GPT as an operator-mediated layer, not an AI therapist).

NotebookLM

A multidisciplinary team combining harmonic R&D, psychological lineage, and software engineering

Mariano Fernández Méndez
HIT co-author & AI/ML specialist (research, writing, technical systems).

Nicolás Echániz
AlterMundi President & HIT co-author (harmonic R&D lead).

Julián De La Reta
PMP Creator (Lic. Psychology, Jungian/Psychodrama training, 15+ years practice).

Anabella Scigliano Mattiauda
Researcher/Software Developer (built Beacon app/web, protocol design).

Aline Ferreyra Lemoine
Integral wellness practitioner (embodiment facilitation & group dynamics).

Saira Asúa
Product designer & Ops (UX research, brand, physical object, group-care).

Federico Bonino
Sound engineer (signal quality, acoustic analysis, lead programmer).

The team is in Costa Rica right now, executing this pilot phase.

NotebookLM

We are currently pre-pilot, seeking operational access to Costa Rican boutique partners.

Status Snapshot: We have working artifacts, 15+ years of PMP practice, and qualitative pull, but we are placing the **first paid pilots** right now.

Ask 1: Operational Access

Qualified introductions to boutique wellness operators and retreat hosts in Costa Rica.

Ask 2: Local Champion

A local champion who can open, qualify, and filter these operational conversations.

Closing Anchor: Capital is a next-stage conversation, strictly conditional on validating the format through these first paid pilots.

NotebookLM
